

GOUDARZ JAVADIZADEH

Flutter Architect | Full-Stack Engineer | Real-Time Systems

+90 536 719 58 86 | goudarzj@gmail.com | linkedin.com/in/goudarz-javadi-zadeh | github.com/GoudarzJ | Istanbul, Turkey

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 25+ years of experience building scalable mobile, web, and desktop applications. Specialized in Flutter and Dart with a strong track record in real-time systems using WebRTC, LiveKit, and WebSocket. Proven ability to own full product lifecycle — from architecture to production — while delivering measurable business impact. Experienced in enterprise ERP systems, fintech platforms, and consumer mobile apps serving 150,000+ users. Open to freelance projects, consulting engagements, and remote-first full-time roles.

TECHNICAL SKILLS

Mobile & Cross-Platform: Flutter, Dart, Riverpod, LiveKit, WebRTC, WebSocket, JSON-RPC 2.0, Objective-C, iOS, Android

Backend & Full-Stack: C#, .NET Core, ASP.NET Web API, Blazor, WinForms, WPF, Python, FastAPI, Next.js, React

Database: SQL Server, PostgreSQL, MySQL, Query Optimization, Data Modeling, Indexing

Tools & Methodology: Git, Agile, Scrum, CI/CD, Figma-to-Flutter, Version Control, REST APIs

Languages: English — Advanced | Turkish — Intermediate | Farsi — Native

PROFESSIONAL EXPERIENCE

Senior Software Engineer

DGN Tech Inc. — Part-time, Remote | Mar 2026 – Present

- Built VIBE Social, a real-time social platform in Flutter featuring live voice and video rooms, instant messaging, community discovery, and multiplayer in-app games.
- Implemented WebRTC for peer-to-peer audio/video streaming, LiveKit for room orchestration, and WebSocket/JSON-RPC 2.0 for real-time chat and game state synchronization.
- Delivered a fully cross-platform iOS and Android product from a single Flutter codebase using Riverpod for state management.

Skills: Flutter, Dart, LiveKit, WebRTC, WebSocket, JSON-RPC 2.0, Riverpod, iOS, Android

Senior Software Developer

Fringe Interior — Contract, Remote | Jan 2022 – Apr 2024

- Developed a Flutter-based interior design platform that shortened client workflows from 1 week to 30 minutes for 1,000 users.
- Enhanced application performance by 35% and drove a 20% rise in user engagement through refined feature design.
- Streamlined SQL Server ERP processes, cutting transaction time by 30% across 10,000+ records and introduced mobile ERP capabilities.

Skills: Flutter, Dart, ASP.NET Web API, SQL Server, C#, ERP, Git

Software Engineer

Payam Co. — Contract | Jan 2017 – Jan 2018

- Designed and launched a multi-sport reservation platform across 120 facilities, scaling to 150,000+ users and delivering 2x revenue growth in three years.
- Built a master admin panel for class scheduling, membership, and facility management, boosting administrative efficiency by 40%.
- Engineered scalable .NET Core and SQL Server backend with automated accounting, reducing financial processing time by 25%.

Skills: .NET Core, C#, SQL Server, RESTful APIs, Agile

Software Engineer

Green Dataware — Full-time, On-site | Feb 2018 – Nov 2021

- Optimized SQL Server query performance for a high-traffic ERP system, boosting transaction processing speed by 30% across 10,000+ records.
- Refactored WPF desktop application core rendering, reducing load times by 25% for 3,000+ users and improving overall satisfaction by 15%.
- Designed modular API architecture to support future Flutter mobile ERP integration across enterprise clients.

Skills: C#, SQL Server, WPF, .NET, ERP, REST APIs

Software Developer

J Publication — Full-time | Jan 2007 – Dec 2017

- Built a mobile book reader and retail app in Objective-C serving 30+ bookshops, growing digital readership by 25%.
- Developed a suite of business applications for sales tracking, book production, cost forecasting, and resource allocation — improving operational efficiency by 30% and revenue by 20%.
- Optimized SQL Server performance across 30+ locations, reducing data errors by 15% through query redesign and indexing strategies.

Skills: Objective-C, iOS, C#, WinForms, SQL Server, Project Management

Developer & Data Analyst

Cancer Research Center — Hybrid | Jan 2006 – Dec 2007

- Designed a data entry and management system for a 15-year longitudinal cancer study, handling 30M+ records across 10,000 participants.
- Built precise reporting infrastructure for research teams, establishing deep SQL Server expertise that carried through the entire career.

Skills: C#, SQL Server, Data Analysis, Reporting

KEY PROJECTS & ACHIEVEMENTS

VIBE Social App (Feb 2026 – Present)

Next-generation real-time social platform combining live video/voice rooms, instant messaging, multiplayer in-app games, and community features. Built entirely in Flutter targeting iOS and Android.

Emekdis Dentistry Website (May – Jun 2026)

Full-stack Next.js website with custom CMS and admin control panel for real-time content management. Responsive, high-performance platform for patient-facing clinical services.

Istanbul Real Estate App (Oct 2023 – Sep 2024)

Full-stack Flutter mobile app integrated with a custom C# REST API and SQL Server database. Served 1,000+ users with real-time property listings and currency tools. Cut load times by 25% through API and database optimization.

Flex Money — Global Transfer App (Feb – Mar 2023)

Cross-platform Flutter fintech app for international money transfers. Achieved 3,000+ downloads in six months. Reduced transaction processing time by 20% via efficient state management. Pixel-perfect Figma-to-Flutter implementation.

EDUCATION

Master's Degree

Management Information Systems

Istanbul Topkapi University, Istanbul | 2025 – 2027

Status: In Progress

Bachelor of Science

Industrial Engineering

Azad University | 1996 – 2001
